Licensed Auctioneers: Harvey G. Stack, #522763; Norman Stack, #798113.

TERMS OF SALE

1. This is a public auction sale conducted by licensed and bonded auctioneers. The principal licensed auctioneers are Harvey G. Stack, #522763 and Norman Stack, #798113.
2. **A 10% BUYER'S CHARGE will be added to the "hammer price" of each lot as determined by the auctioneer.** This 10% **BUYER'S FEE** will be added to the invoice of each successful bidder regardless of a bidder's affiliation with any group or organization, bidding by mail or in person. Bidders must pay all Postage and Insurance charges.
3. We cannot be responsible for any errors in bidding. Please make certain you bid on the correct lot. When bidding for items in the sale, the bidder whether bidding in person, by mail, or by agent, agrees to abide by all the terms of sale. The highest bidder shall be the buyer, and if any dispute arises between two or more bidders, the lot in question shall be immediately put up and sold again.
4. **MAIL YOUR BID SHEET EARLY.** These bids will be treated as your maximum bid for each lot. In general, we start the bidding on each lot at a small advance over the next highest bid, thereby attempting to purchase the lot as reasonably as possible for you. When identical mail bids are received by the auctioneer, preference is given to the first bid received. A mail bid will take precedence over an identical floor bid, and a floor bidder must bid higher than the highest mail bid to be awarded any lot. The auctioneer reserves the right to refuse ridiculously low bids which he, in his sole discretion, feels are not made in good faith. The auctioneer reserves the right to open the lot at a reasonable price, to set bidding increments as he, in his sole discretion, shall determine, and to withdraw any lot at any time. Estimates given are for the general guidance of the bidder.
5. The auctioneer and cataloguer, STACK'S, reserves the right to include its own material in any auction sale. The auctioneer may have direct or indirect interests in these and other items, and may collect a minimum price in addition to the selling commission. This paragraph shall be deemed a part of the description of all lots contained in the catalogue. Consignors may be permitted to bid on their own lots in the sale. The auctioneer may make loans or advances to consignors and/or prospective purchasers. The auctioneer may bid for its own account at any auction and may have access to information concerning the lots and items contained in them that are not otherwise available to the public. Estimates contained in the catalogue represent the cataloguer's estimate of the fair market retail value of the lot based on experience and comparable sales, if applicable. The auctioneer may open bidding on any lot by placing a bid on behalf of the seller. The auctioneer may bid further on behalf of the seller up to the amount of the reserve, by placing successive or consecutive bids for a lot, or by placing bids in response to other bidders. The auctioneer may accept or decline any bid, or challenge to any bid, as he in his sole discretion shall determine.
6. Auction sales are not approval sales. In the event of non-payment by the buyer, STACK'S expressly reserves the right to refuse to deliver the lots, and in addition, STACK'S reserves any and all rights that it would be entitled to under the uniform commercial code, including buyer's consent to file a financing statement without need of buyer's signature. Floor bidders are encouraged to carefully examine all lots on which they are interested in bidding since, except for reasons of non-authenticity, **NO LOTS PURCHASED BY FLOOR BUYERS MAY BE RETURNED**, including those lots where the floor buyer is acting as agent for another, or those lots sold to mail bidders who have examined the lots. No lots will be delivered at the sale. All items offered in this catalogue are guaranteed to be genuine and correctly attributed. Claims to the contrary must be made within seven (7) days after receipt of the material.
7. No lot may be returned for any reason whatsoever without the prior written consent of STACK'S, or without its original container. Grading is a subjective description in the opinion of the cataloguer as to the state of preservation of a

TERMS OF SALE (continued)

particular coin or lot. The term "proof" or "specimen" is used to describe a method of manufacture, and is not a grade or condition. Such terms are the opinion of the cataloguer and shall be deemed to be part of the description, and not an attribution. No warranty, whether expressed or implied, including a warranty of merchantability, is made with respect to such adjectival descriptions, which can and do vary among experts.

8. No lots will be put up out of their numerical order. Coins, medals, etc. are sold so much per LOT, no lots will be broken up.
9. Unknown bidders must establish credit references or submit a deposit of 25% of their bids. By bidding in this sale, even if for a corporation or another individual, a bidder personally guarantees prompt payment. We cannot accept bids from minors. By bidding in this sale, the bidder acknowledges that the purchase is not a consumer credit transaction. **TITLE REMAINS WITH STACK'S UNTIL PAID FOR IN FULL.** It is the buyer's responsibility and obligation to have the lots fully insured while in his possession. Risk of loss is on the buyer.
10. Auction sales are strictly for cash and must be paid for promptly in U. S. funds. All bidders personally guarantee prompt payment. Checks are acceptable with proper identification. On any accounts past due, STACK'S reserves the right to extend credit and impose periodic charges as stated on the invoice or statement.
11. All lots delivered in New York State are subject to applicable Sales Tax.
12. Except for any claim or controversy arising out of non-payment (which, at the exclusive option of the seller or auctioneer may be referred to arbitration), any claim or controversy arising out of this sale shall be settled exclusively by binding arbitration under the rules of the Professional Numismatists Guild, Inc., then in effect. By bidding in this sale you agree to be bound by the arbitration provisions of the Professional Numismatists Guild. In all cases, the maximum liability of STACK'S for any item sold shall be limited to the official price of record of the item at this sale.

ALL PHOTOGRAPHS IN THIS CATALOGUE (AS IN ALL
STACK'S CATALOGUES) ARE OF THE ACTUAL COINS BEING SOLD

STACK'S GRADING POLICY

For Mint State or Uncirculated Coins

Stack's believes that adjectival grading is the best way to describe a coin. However, as numerical grading has become part of the grading vocabulary, Stack's wishes to define the adjectival and numerical grading as we interpret it in this catalogue.

Comparative Grading Language

Brilliant Uncirculated is at least MS-60

Choice Brilliant Uncirculated is at least MS-63

Gem Brilliant Uncirculated is at least MS-65

It should be understood by all that grading is a subjective art. See our Terms of Sale above for a full explanation.

In Memoriam
Corrado Romano
1903 - 1984

He came here to assist with the paving of roads in gold, not to walk them—as he was promised, as we were told to do. He brought a simplicity of aesthetics to the collecting and marketing of coins. The prodigal son of a banker, he was misunderstood by his social peers who displayed embarrassment over the thought of Andrea's son operating his junk-dealerlike profession; the man spent much time contemplating and contextualizing the guaranteed hopes depicted on his new nation's coins, promises he knew would only materialize if he mustered the devotion, the patience, the frugality of his life for past and future generations.

In his grandiose obsession with ethics and promise did he pursue, for many decades, the culmination of all that was good and honest, fair and viable, good yesterday and tomorrow—the 1792 Silver-Centered Cent: an artform of pragmatic beauty, simplicity and integrity, citing not alone but by itself, by the incorporation of a half-penny plug silver into a collar of like value of copper—that for the first time and for all time no man need worry for the international intrinsic

value and appropriate acceptance of the coinage of these United States—praying that his children would have in excess of he, pridefully knowing that this was something to diligently devote a lifetime to, even in time of the most ostentatious growth this country will ever experience, not to give without trial, test, essay, assay, lest it be lost to immediate satiating pleasures.

In his love for and of numismatics, he overbought his “pets” to points of occasional liquidity-embarrassment. Offered a select Proof 1856 Flying Eagle Cent just prior to the birth of his first child, he purchased it using the funds so frugally put aside to remunerate for the medical services; his nephew and he rolled stock Indian Cents to convert to “spendable” cash to cover expenses incurred in the hospital. So pleasantly obsessed over both events, he retained the coin and nicknamed his child “Penny”.

His notes and stock contributed to the information and knowledge of Dr. Sheldon's, Q.D. Bowers', Valentine's, Bolender's, the Stack sons' and others' numismatic works, revisions and repricings; consigned stock to the larger retail houses of the times, and justified selling prices relative to availability confirmed by his guaranteed purchasing transactional responses from his famous “yellow-covered-catalog”, used for decades as a proven buying and selling price ledger by most of the dealers extant from the thirties into and through the mid-sixties, watching these and others adopting his philosophies of indignant dignities and complex simplicities.

His practical approach to numismatics for the aspiring middle class, and his commitment to establish norms for and of awareness, aesthetics, spectral grades and their standards, and consistent reference to supply-and-demand pricing has enriched the hobby and business for all—collectors and dealers alike. He loved and was loved; and now, he lies in friendly fields.

EXTREMELY RARE
SILVER 1776 CONTINENTAL DOLLAR N.1-C
SECOND KNOWN SPECIMEN

*Lot No. 24
(Enlarged)*

EXTREMELY RARE
SILVER 1776 CONTINENTAL DOLLAR N.1-C
SECOND KNOWN SPECIMEN

Lot No. 24

- 24 **1776 Continental Dollar in Silver.** 373.25 grains. "CURRENCY," Newman 1-C. **Very Fine**, but weak across central obverse through N and left part of C, and on matching areas of the Maryland and Virginia rings on reverse; obverse break at GI well advanced. Natural light grey and iridescent toning, no significant marks, the surfaces very nice for the grade.

This specimen is apparently unlisted anywhere in American numismatic literature. Until we received it on consignment, we were unaware of the existence of any silver example of the N.1-C dies other than the Garrett specimen. In common with that piece, and also with the two known specimens in silver of the "E.G. Fecit" N.3-D dies, the present coin is overstruck on a Spanish milled dollar of the type manufactured in many Latin American mints in the 1740's to 1750's, with the continuous wreath of leaves on the edge characteristic of that period. (The use of Spanish milled dollars as planchets for the silver Continental Dollars was first discovered by John J. Ford, Jr.) Its weight is less than 0.5% below that of the Garrett coin, both specimens being worn; its specific gravity is in the range of .880 Fine silver or a bit better, not out of line with the Spanish undertype. The two specimens show strong and weak points in different areas, particularly on the reverse.

This specimen represents a later die state than that of the Garrett coin, the die buckling evident on the earlier piece from right central obverse to the rim weakening the N in CURRENCY now being succeeded by a much greater degree of die buckling, running in fan shape from the sun face to the rim in the same area, virtually obliterating the center of the sundial and eliminating most of the left half of the second C in CURRENCY, though the present specimen shows less actual wear. Without question, both were struck after the production of the pewter specimens from the same dies, but before failure of the obverse die led to introduction of the new N.2 obverse. Apparently, the previously struck silver of the Spanish dollars, even if annealed before overstriking, proved too tough for the dies, and they began to break down on the right obverse (similar "die buckling" is known on some 1794 Half Cents, New Jersey Cents, and Connecticut Cents, among others of the same general period).

(Continued on next page)

For a decade, a theory concerning the nature and purpose of the "Continental Currency" coins has been under development. Taking into account the known specimens in pewter, brass, and silver, it also utilizes contemporary records concerning both the coins themselves and the surrounding conditions of the economy and the governing bodies. Initially proposed by John J. Ford, Jr., and now supported (as well as further developed) by other scholars, this theory holds that the earliest pieces struck were those in brass, and that they were patterns for coins in that metal which were intended to circulate as "heavy Pennies," passing at 12 to the shilling (which was equal to $\frac{1}{8}$ of a Continental Dollar). As evidence in support of this part of the theory is the item reported in the June 27, 1776 issue of "The New-York Journal, or the General Advertiser, printed and published by John Holt near the Coffee House," reprinted in the June 29 issue of the "Constitutional Gazette" in Philadelphia: "We hear it is proposed, that after three months, the currency of all Copper Coin made of bad metal, or wanting in weight, is to be totally suppressed, and that the rest is to pass at the rate of 15 for an eighth part of a dollar. And if it shall appear that there is not a sufficiency for common use, that it will all be called in, and a new impression struck of Continental Copper Coin, of a larger size, twelve of which is to pass for an eighth of a dollar, after which no other Coppers are to pass current. (Mr. Holt's Journal)." The theory further suggests that the earliest "Continental Currency" pieces - the brass "Pennies" - were struck in New York, which certainly agrees with the earliest published information in the papers occurring in that city rather than Philadelphia.

The great rarity of brass pieces is believed to have been caused by the shortage of brass and copper in the developing war situation in 1776 (much as we produced the zinc-coated steel Cents in 1943 when copper was so vital to production of military goods during World War II). If the brass Penny issue was terminated due to lack of brass, then it stands to reason that the familiar pieces in high-grade pewter, like our 1943 steel Cents, were produced as an emergency substitute, and were intended to serve as Pennies during the war years. The information in Ben Franklin's diary to the effect that an extreme shortage of tin and high-grade pewter developed in 1776, affecting the ability of the tinsmiths to produce canteens and other implements for the soldiers, may have been caused, to some extent, by the number of pewter Pennies being struck; the number of surviving specimens from the N.1-C, 2-C, and 3-D dies combined indicate an original mintage total of more than 6,000 pieces.

What then was the relationship of the **silver** specimens from the 1-C and 3-D dies to the specimens in pewter, which the theory proposes were "emergency" Pennies? Eric P. Newman provides us with one clue. In his book on **The Early Paper Money of America**, in discussing the Continental Congress issue dated July 22, 1776, he notes that the \$1 denomination was intentionally omitted from the series because production of the Continental Dollar in silver was expected shortly; as confirmation, we note John Ford's point that the New York paper money issue of August 13, 1776, also omitted the \$1 denomination, undoubtedly for the same reason if the Continental coins were being produced in that city as early as June or July. If the proposed Dollars are represented by the surviving examples (including the present specimen), then it is logical that they should all be overstruck on Spanish

(Continued on next page)

milled dollars since those were by far the most common large silver coins available in America at the time. That they should have been overstruck on **well worn** Spanish dollars also makes sense, since worn coins would not have brought their full face value in international trade.

There is some indication, both in the weight of the known specimens (roughly 370 to 385 grains) and in the almost total absence of traces of the underlying type, that the coins used were smoothed down before overstriking them; this would have served both to bring them within a certain weight range (apparently, from the specimens themselves, roughly 385 grains) and to keep them from being exported for bullion since their weight would have been well below the 416 grain Spanish standard.

As to the dates of striking of the silver "Dollars," as well as to the proposed theory that while the first issues were struck in New York, the later issues were struck in Philadelphia, analysis of the die combinations and the known surviving specimens in various metals from them provides relatively clear evidence:

Newman Die Pair	Brass	Pewter	Silver
1-A	R-8 (Unique?)		
1-B	R-7	R-8	
1-C		Low R-3	R-8
2-C		Low R-3	
3-D (E.G. Fecit)		Low R-3	R-8
4-D		R-8	
5-D		Unique	

Newman undoubtedly has the first group of dies in the correct order. It is significant that essentially all collectible specimens in brass are from the N.1-B dies, and that pewter strikes from those dies are extremely rare; this is precisely the situation we would expect if the initial pattern strikes were made in brass, as the newspaper article implied they were to be, but that pewter had to be substituted shortly thereafter for the Pennies. That the brass pieces were struck as patterns is, to some degree, supported by the presence of both the unique 1-A and some of the 1-B's in the Bache Collection (W.E. Woodward sales of 3/20/1865 and 12/19/1865): Benjamin Franklin is closely associated with the obverse design of the coins, and the Bache family was descended from Richard Bache (1737-1811) who married Franklin's daughter Sarah in 1767, and succeeded Ben as Postmaster General in 1776.

The rather high number of surviving specimens in pewter of N.1-C and N.2-C shows the importance attached by the Continental Congress to production of Pennies as a far more important factor in the daily economic life of the country than the striking of large silver coins; on the other hand, the existence of the Garrett specimen and the present piece in silver shows that the issuance of "Dollars" was also regarded as of importance, doubtless for trade and international payments as well as to bolster public confidence.

(Continued on next page)

There is a clear break between the N.1-A-2-C die series and the later N.3-D-5-D dies. If we assume, as seems logical, that the N.1-B dies were used to strike pattern brass pieces in late June, 1776, and if a large number of pewter 1-C pieces were then struck, followed by the silver 1-C issue, and then by the large issue of pewter 2-C coins, we have a logical termination of this series of dies in late August, 1776, when the British seized New York City and environs. The die cutters may have escaped; the dies surely perished, either through capture or through destruction by mint personnel.

The "second" die series, which must have been made outside New York, and may well be attributed to Philadelphia, are probably not in the correct order of production; it is much more likely that N.5-D was made first, since that obverse is poorly arranged; N.4 was probably the next obverse made, though it also fell short of expectations in quality. Finally, obverse die N.3 was engraved; this one was accepted, and the die cutter (Gallaudet, or whoever—that is still in dispute) signed his name to the dies and production began. That Congress had not lost hope of producing "Silver Dollars" is indicated both by the existence of two silver specimens of the N.3-D issue and by the continued omission of the \$1 denomination in the November 2, 1776 Continental Congress paper money issue.

Analogous to the "Muera Huerta" silver pesos of the Mexican Revolution in 1915, silver (or other) Continental coins would have been dangerous, if not fatal, to carry in British occupied territory during our own Revolution. The well worn state of both specimens of the N.1-C issue in silver, as compared to the EF condition of the two known N.3-D silvers, does not really indicate circulation in the economy since those earliest two coins have surfaces which imply use as "pocket pieces"; they lack the nicks and bruises normal to coins in their grades. As the Garrett specimen of this issue came from England in the 1860's as part of the Clay Collection, and as at least one of the N.3-D pieces came from England in the mid-1880s, it is possible that British officers captured or otherwise recovered them and kept them as "souvenirs." We have no documented appearance of a silver specimen of either issue being found within the bounds of Colonial America.

The degree of difference in the obverse die deterioration between the Garrett piece and the present specimen indicates striking of quite a number of other "Dollars" in silver between those two pieces. As a rough guess, we would estimate that between 50 and 100 others were coined, possibly even more. In view of the value of silver in that period, a survival rate as high as 2% would have to be regarded as extraordinary, so it is possible that far more than 100 pieces were actually struck from the N.1-C dies, though there is little reason to suspect that more than these two specimens survive today. The importance of the present specimen in showing that the N.1-C Garrett piece was not merely a "mint master's trial" or something similar cannot be overstated. With the single exception of the 1783 Nova Constellatio ".005" pattern in copper, it is probably the most important Colonial piece to surface in more than 50 years; in fact, since the 1783 piece merely confirmed the existence of something whose production was already recorded, this present piece, due to its testimony concerning production of the "Continental Currency" issues, is of even greater significance to our understanding of the history of American numismatics.

U. S. LARGE CENTS

EXTREMELY RARE AND IMPORTANT

1792 SILVER CENTER CENT

Lot No. 143

- 143 **1792 Silver Center Cent.** Judd 1 (Low R-7). From New Netherlands 52nd Sale, 12/13/1958, lot 104, where it was catalogued as follows: "Head of Liberty r., flowing hair; date below, LIBERTY PARENT OF SCIENCE & INDUST: around. Rev. ONE CENT in wreath, UNITED STATES OF AMERICA around it, 1/100 in large figures below; the wreath with sprays of berries remarkably similar to that on the wreath cents of 1793. Serrated borders, diagonally reeded edge, as on the Disme. Copper, with silver plug in center; made December 18, 1792, according to the Voight plan, and the first type of coin ever to be struck in the United States Mint. Just about EF-40 in sharpness, but with many really faint field scratches." Medium brown and olive toning, sharply struck. **One of approximately a dozen specimens known today.**

(Continued on next page)

(Lot No. 143 continued)

The most recently published research on this historic design was P. Scott Rubin's study in 1984, published by The American Numismatic Society as part of the proceedings of the **Coinage of the Americas Conference** on America's Copper Coinage, held November 30-December 2 of that year. He was able to list, and provide photographs of 11 distinct specimens as follows:

- 1) Ellsworth—Raymond—Garrett "Unc"
- 2) Warner—Winsor—Lauder—Weinberg "AU"
- 3) Davis—Jenks—Lohr—"River Oaks"—Robert Hughes—unknown purchaser—Smithsonian Institution
- 4) Morris—eastern collection—Mitkoff/Numismatics Ltd.—1974 GENA Sale—Anton—private collection "EF-AU"
- 5) Charles I. Bushnell—Lorin G. Parmelee—H.P. Smith—George H. Earle—Carl Wurtzbach—Virgil Brand—Belden Roach—Will W. Neil—F. Eubanks—Stack's—Mrs. R. Henry Norweb—New Netherlands—NN 52nd Sale—C. Romano. (The present example). "AEF"
- 6) Stearns—Groves "EF"
- 7) Elder 1907—Judd—Leidman—eastern collection "AEF"
- 8) Mickley—Cohen—Dohrmann—Woodward—Virgil Brand—Benedetti (early 1960's)—Tom Ryan—1964 Kreisberg/Schulman sale—Gibson Sale—Roper Sale. "AEF"
- 9) Morgenthau 1933 (ex Brand) "Good"
- 10) F.C.C. Boyd—Eric P. Newman "AEF"
- 11) Brock—U. of Pa.—Philip Ward—John J. Ford, Jr.—Mrs. R. Henry Norweb "AU"

Further research makes it probable that Bushnell acquired the present coin from Cogan's sale of April 1863; the Garrett coin was probably acquired by Ellsworth from the Gschwend Sale, and Raymond never owned it since Garrett bought the Colonial, Private & Territorial, and 1792 series from Ellsworth's agent **directly**.

It is suspected at this time that one, or possibly two, further specimens exist. As the Smithsonian specimen is as thoroughly out of the market as anything can be, we are left with 11 or 12 specimens.

This specimen was plated in every auction catalog in which it has appeared, from Bushnell in 1882 through its last public sale in 1958; it was plated in the 1914 ANS Catalogue of the U.S. Coinage exhibition; it was the plate coin in the Red Book for many years, and also the plate coin in the Standard Catalogue. In addition to its innate significance as a specimen of our first coin issue from the new Mint, the impressive pedigree of this piece makes it a part of the legendary past of American numismatic history. (SEE COLOR PLATE)

MAGNIFICENT 1793 CHAIN AMERI

Lot No. 144

- 144 1793 S.1 (R-4). Wide Date. **Chain. AMERI.** From New Netherlands 50th Sale, lot 879, December 1957, where it was catalogued as, "**The Second Finest Known Chain AMERI**; Sheldon 1; Crosby 1-A. Rarity 4. **The famous Chain AMERI.** AU-50. Light brown, the obverse especially with silvery iridescence representing the 'cartwheel' or mint bloom of an Uncirculated coin; the reverse with traces of prooflike gloss reminding us very much of the splendid Mickley-Bareford MS-60. Minute planchet defects as made, especially on reverse. Undergraded in EAC (Early American Cents), but Dr. Sheldon subsequently graded the coin AU-50 after it had been properly brushed. It is second only to the Mickley coin, and we believe superior to the Fritz cent, long thought second finest. The present coin is pictured (both sides) on Plate 1 of EAC Ex M.A. Brown (1897), Allison W. Jackman (1918, lot 683) as 'probably finest known', H.R. Newcomb (1945, lot 1), where described as 'Unc. Magnificent sharp impression with lustrous original surface' and 'probably unexcelled.' "

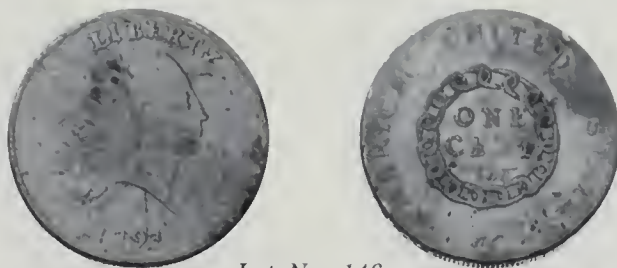

Now, nearly 20 years later, the coin has developed a lovely light violet overtoning while still retaining all the cartwheel iridescence. A superb opportunity for the specialist to acquire an outstanding example of a famous variety with an important pedigree. (SEE COLOR PLATE)

BEAUTIFUL 1793 CHAIN AMERICA

Lot No. 145

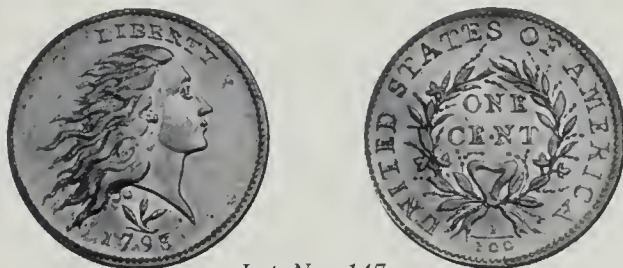

- 145 1793 S.2 (R-4). Wide Date. **Chain. AMERICA.** From New Netherlands 50th Sale, lot 881, December 1957, catalogued there as, "**The Third Finest Known Crosby 1-C; S-2; C.1-C. R-4. AU-55. Mint red**, paling and blending with light olive in a manner described on first sight by one of America's greatest collectors as 'liquid fire'. Without any trace of wear, but a blunt, flat strike, particularly evident on high surfaces of hair, chain and reverse inscriptions. We grade it 55 and not 60 solely because reverse, though with plenty of mint color, shows less 'cart-wheel' than obverse. Absolutely unblemished by circulation or otherwise. This one must be seen to be believed; no photograph, even if in color, could do it justice. Very late die state." The coin has mellowed a bit in the intervening years, but still has the old fire. (*SEE COLOR PLATE*)

Lot No. 146

- 146 1793 S.4 (R-4). **Chain.** Periods variety. AMERICA. Fine-12, small edge test cuts, and a pair of scratches crossing on hair below ear. A multitude of small marks but all major details clear. Medium brown and olive toning, a splash of deep red on reverse.

HIGHLY DESIRABLE 1793 S.8 CENT

Lot No. 147

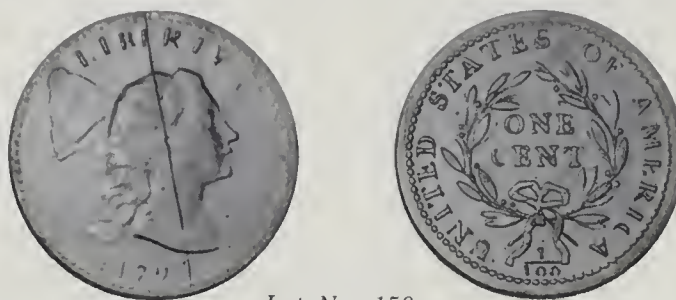

- 147 1793 S.8. **Wreath.** The horizontal stem, high triangular box. Extremely Fine-40. From our 1960 Milton A. Holmes Sale, lot 1358, described there as, "Perfectly centered, needle sharp strike. Glittering, mirror-like surfaces. Faded, possibly simulated mint red, a few insignificant scratches on the obverse." Today, the coin displays pleasing iridescent overtones and a generous amount of red.

Lot No. 148

- 148 1793 S.11a (R-6). Vertical left leaf, beads far from legend, vine and bars edge. Extremely Fine-40 in terms of obverse strength and detail, but porous. The reverse a bit weaker and the porosity approaching corrosion at upper right on that side, the fraction nearly obliterated but other legends and wreath present.

- 149 1793 S.13 (R-4). **Liberty Cap.** Two beads over I, leaf under ME parallel. Very Good-8, ONE CENT weak but visible, other legends and date clear. An edge bruise over TA on reverse. Even deep brown toning, old insignificant hairline scratches, the portrait distinct.

Lot No. 150

- 150 **1793 S.14 (R-5). Liberty Cap.** The bisecting break. From New Netherlands 50th Sale, lot 904, December 1957, catalogued as "S-14; C.13-L. R-5. Liberty Cap; Bisecting Break. This was VF-20, with a reverse nearer to VF-30, but corrosion has been removed by scraping down the field, weakening date and LIBERTY. Reverse very sharp and practically perfect centering; field worked over but much more successfully. Had it been left untouched, this piece would have been of Condition Census level. Ex Elder, March 14, 1937, as 'VF, black.' Later, in the Gaskill collection."
- 151 **1794 S.31. Marred Field.** Long fraction bar. Would probably have been Fine, with olive toning and glossy surfaces, but counterstamped twice on head with a large "C.R" in a serrated rectangle, the reverse center crushed as a result.
- 152 **1794 S.70.** Five braided locks, break between TY, triple leaf under D. Extremely Fine-40 in terms of wear, but a thin cut in upper hair, a dig between BE, and some edge bruises. Deep olive green patina, lighter on the higher surfaces.

Lot No. 153

- 153 **1795 S.74 (R-4).** Lettered edge, single leaves. Extremely Fine-40, the reverse 45. From New Netherlands 50th Sale, lot 981, December 1957, described there as, "Almost completely uniform reddish-brown—almost 'too good to be true'. Not fully struck up on head, elsewhere sharp; surfaces practically flawless. Ex Wurtzbach, Dr. Sheldon collections." A pleasing specimen.

IMPORTANT NOTICE

In accordance with the terms of sale, each successful bidder also agrees to pay a buyer's charge of ten percent (10%) of the winning bid recognized by the auctioneer.

VERY RARE 1795 JEFFERSON HEAD CENT

Lot No. 154

- 154 **1795 S.80 (R-6). Jefferson Head.** Plain edge. From New Netherlands 50th Sale, lot 997, December 1957, catalogued as, "S-80; C-N X2. R-6. Earlier graded 'About VF; VF for coin', this piece has the sharpness of F-15 but is rough, as are many of the Jeffersons; obverse has some minor pitting and a glass reveals that someone has tried to work part of the field over to minimize this. Medium brown patina. Actually fairly decent looking; well struck up and about equally strong (well balanced) throughout, which is unusual. It is one of the four best in collectors' hands. Of the six Condition Census examples, the EF-40 is in A.N.S., and one of the 15 coins is in the Chase Bank, the Hines and Sargent specimens are privately owned, and this and the next lot are the two others. Ex Gutag, T. James Clarke. A struck coin with the sound of good metal—not one of the casts that have been making the rounds. Worth getting excited about!" (*SEE COLOR PLATE*)

- 155 **1796 S.81. Liberty cap.** Pole attached to bust, double leaf under N. Fine-15, a nick on nose but surfaces otherwise nice for the grade. Struck slightly off-center toward ten o'clock, medium to deep brown toning with touches of olive, some natural glossiness.
- 156 **1796 S.87. Liberty cap.** The low 6, double leaf left of ONE. From New Netherlands' 50th Sale, lot 1008, December 1957, described as, "Fine-12, medium steel. Reverse almost VF-20 grade but weakly struck at OF; obverse with some superficial scratches and hardly as bold. Ex Gaskill collection." The coin has now toned to light brown and olive, with some hints of iridescence.
- 157 **1796 S.92. Draped bust.** Close 96, 6 leaning right, single leaves. VG-10 obverse, F-15 reverse, the obverse somewhat pitted and the reverse with partial rough greenish patina. Light brown toning.
- 158 **1796 S.104. LIHERTY,** Triple leaf under O. Obverse Good-4 because of pitting, full date, LIHERT strong; the reverse is Very Good-8. Medium brown toning.
Ex Mayflower Auction, lot 71, November 1958.
- 159 **1796 S.110.** 96 Close and connected, double leaf, chips under E. From New Netherlands' 50th Sale, lot 1027, December 1957, described there as "This has the sharpness of a VF-20, although with a very rough black surface—once in a fire?"
- 160 **1796 S.111 (R-5).** Date leans right, 9-6 close, double leaf, chips under E. Fine-12, deep brown toning. Planchet a bit porous but full sharp date and drapery. In the bottom half of the Condition Census (which runs as low as Very Good-10).

- 161 1796 S.114 (R-5). 6 in the drapery. Fine-15, deep brownish black patina with some porosity and softly struck at OF. Full strong date, sharp bust, late die state with both obverse rim breaks heavy, one of them completely covering the tops of TY.

Lot No. 162

- 162 **1796 S.115 (R-4)**. 6 high, tilted left, wide denominator. From New Netherlands' 50th Sale, lot 1031, December 1957, where the coin was described as, "Reverse Type of 1797. Fine-12, medium steel and brown gloss. Faint old scratches. Early state, perfect obverse die. Of unsuspected importance, as a 15-coin is included in the Condition Census—and four of the CC coins are in A.N.S.! So this is one of the finest in collectors' hands. Ex Chris Peterson."
- 163 **1797 S.126**. Both tops of 7 touch drapery, crack from rim to throat. Extremely Fine-40, deep reddish brown toning with a nice gloss to the surfaces, the obverse die break well advanced.
Ex Mayflower Sale, lot 11, March 1958; previously from the Proskey Collection (1916).
- 164 **1800/1798 S.190 (High R-5)**. Overdate with missing curl, left side of final A double cut. Very Good-10, underdate clear, medium brown toning with some red and green encrustation on obverse field and bust. The only 1800 dated obverse with Type I hair.
Ex Mayflower Sale, lot 67, November 1958.
- 165 **1800 S.212 (R-4)**. Chips variety. Fine-12. From our Straus Sale, lot 187, May 1959, there described as, "Medium brown steel; clean, almost hypnotic surfaces. Rare and Beautiful."
- 166 **1803 S.261**. Wide date, arc crack through date, shoulder, and hair to rim. Fine-15, light gray steel mottled with black, a few splotches of corrosion, most of which are removable. Common variety, but almost the sharpness of Very Fine and definitely above the usual run. Late die state, swelling under and behind lowest curls.

STACK'S GRADING POLICY

For Mint State or Uncirculated Coins

Stack's believes that adjectival grading is the best way to describe a coin. However, as numerical grading has become part of the grading vocabulary, Stack's wishes to define the adjectival and numerical grading as we interpret it in this catalogue.

Comparative Grading Language

Brilliant Uncirculated is at least MS-60
Choice Brilliant Uncirculated is at least MS-63
Gem Brilliant Uncirculated is at least MS-65

It should be understood by all that grading is a subjective art. See our Terms of Sale for a full explanation.

U. S. HALF DIMES

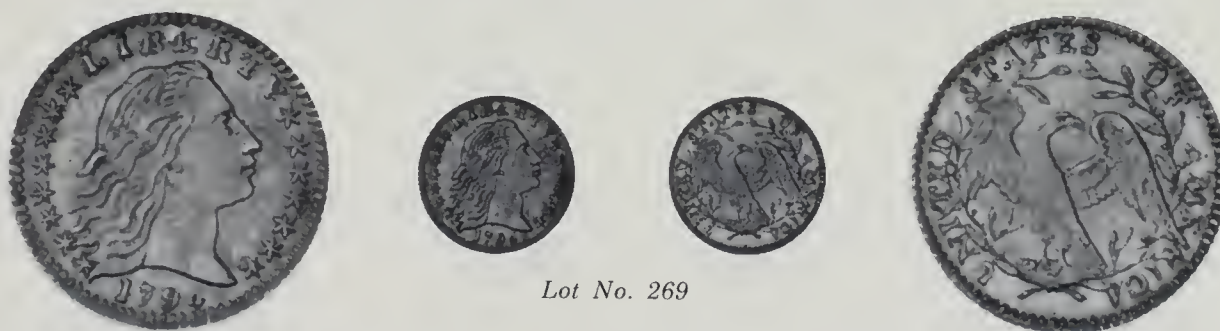

RARE 1792 HALF DISME

Lot No. 268

- 268 1792 Half Disme. Very Fine, a hairline scratch through IBPAR on obverse, and some deeper ones on reverse. Blue-gray and dusky gold toning, the denticles nearly complete despite being struck slightly off-center. Struck on medal axis, apparently standard for all the issues of 1792. Far better than average condition for this first issue of the denomination. Not a pattern, but an actually released to circulation issue, and this a "must" for type collectors as well as Half Dime specialists. (SEE COLOR PLATE)

VERY RARE AND BEAUTIFUL 1794 V.2 HALF DIME

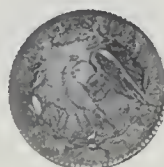

Lot No. 269

- 269 1794 Valentine 2 (R-6). From New Netherlands' 52nd Sale, lot 345, December 1958, where it was described as follows: "Close date, the 4 recut; double leaf at top of right branch. Deeply toned **Uncirculated**, mainly blues and grays. Surface naturally mirrorlike, as on the frequently seen 1796 Quarters, rather than frosty - though naturally a little dulled by the tarnish. Unblemished, save for a minute discolored spot on either side. Not well struck up, but in every way superior to the Valentine plate coin, the EF 'World's Greatest Collection' specimen (1945), and the Dupont example. Ex Brand."

Over the last two decades, the obverse has developed a handsome russet toning, and the "discolored" spots have blended into the rest of the toning nicely. An outstanding specimen of this rare variety. (SEE COLOR PLATE)

EXTREMELY RARE AND DESIRABLE 1795 V.3 HALF DIME
THE VALENTINE PLATE COIN

Lot No. 270

- 270 1795 V.3 (High R-7). From our Milton A. Holmes Sale, lot 2566, October, 1960, catalogued there as: "This is the Valentine plate coin, with the very large die break on the obverse. Strictly **Uncirculated**, golden and iridescent toning. Struck on a slightly granular planchet. Extremely Rare variety. Newlin knew of only 2 and Breen only 1. This is perhaps the 'finest known'." In the intervening years, the toning has richened and deepened somewhat. An important opportunity for the specialist. (SEE COLOR PLATE)

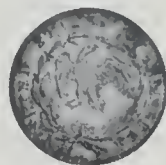

MINT STATE 1795 V.6 HALF DIME

Lot No. 271

- 271 1795 V.6 (Low R-4). **Brilliant Uncirculated**, light diagonal adjustment marks on obverse under a glass, bisecting die break from Y to 7. Magnificent rose-gold centers framed by neon blue borders. A glittering jewel. (SEE COLOR PLATE)

MAGNIFICENT 1796 V.1 HALF DIME

Lot No. 272

- 272 1796 V.1 (R-5). From our Milton A. Holmes Sale, lot 2577, October, 1960, described there as, "The 1 and 6 are re-engraved. This coin is a **Specimen Striking** and has all the indications of a Proof. Die clashing marks from the reverse are evident. Two tiny nicks, one in the hair and one in the ear, really do not impair its value; it is still a beauty!" The coin has now developed a pleasing russet gold toning, and the fields are highly reflective. Vastly superior to the Valentine plate coin. (*SEE COLOR PLATE*)

Lot No. 273

- 273 1796 V.1 (R-5). Another. Very Fine, some old hairline scratches on obverse. Gray and deep gold toning, the reverse very sharp for the grade.

Lot No. 274

- 274 1797 V.2. The 15 Star obverse. Superb. A sharp strike but weak in the centers, characteristic of this variety and doubtless caused by the bisecting obverse die breaks. **Strictly Uncirculated** with blue-gray toning. Rare in Mint State.

Ex Milton A. Holmes Sale (Stack's), lot 2579, October 1960.

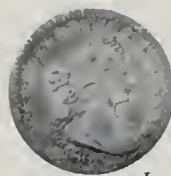

Lot No. 275

- 275 1797 V.4 (R-5). The 16 Star obverse. Fine, with some claims to a higher grade, deep iridescent toning. A choice example of this popular type coin, pleasing and desirable.

Ex Philip G. Straus Sale (Stack's), lot 667, May 1959.
- 278 1803 V.2. Large 8. Very Fine obverse, the reverse slightly weaker as is often the case with this entire type. Light to moderate toning, predominantly blue and rose.
Ex Milton A. Holmes Sale (Stack's), lot 2585, October 1960.
- 279 1805 V.1 (R-4). Only dies of the year. Fine, perhaps better, but weak at centers and upper right reverse (as often seen), and the granularity of the planchet still showing in the poorly struck areas. Light scratches at right obverse, russet and iridescent toning with traces of lustre around the legends.
- 280 1829 V.3. Triple stripes in shield. **Brilliant Uncirculated**, a small untuned patch near eagle's beak but otherwise handsome red-violet. Triple stripes were used only in 1829, and on only three of the 14 varieties.
- 281 1829 V.5. Double stripes. Brilliant Uncirculated, sharp and frosty. Rich blue toning with a splash of gold on each side.
- 282 1829 V.12. Double stripes. About Uncirculated, hairline scratches on cheek. Proof-like, lovely rainbow iridescence.
- 283 1830 V.1. **Brilliant Uncirculated**, light cheek marks and somewhat softly struck at centers. Prooflike, with multi-colored iridescent toning.
- 284 1831 V.5. Choice About Uncirculated, well struck, glittering rainbow toning.

Lot No. 285

- 285 1832 Breen 10 (Obv. V.8, Rev. B.3) (High R-7). No berries. **Brilliant Uncirculated**, slightly soft strike at centers. Deep grey blue with pink and green overtones. The only "No Berries" reverse die of the year, used only on V.3 (R-7) and this combination (which was unknown to Valentine).
- 286 1833 V.1. Brilliant Uncirculated, gold and tan toning with touches of blue. Die breaks from both wingtips, as well as the one Valentine describes from cap to drapery.
- 287 1834 V.4. **Choice Brilliant Uncirculated**, very sharp strike, full cartwheel lustre. Die break from cap through cheek and jaw to bust and then rim.
- 288 1836 V.4a. Crack from rim through cap to lowest curl. About Uncirculated, deep gray and russet toning.

EXTRAORDINARY 1838'O' HALF DIME

Lot No. 294

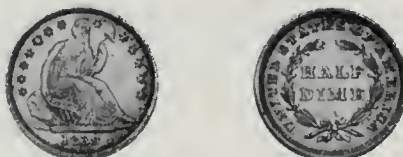

- 294 1838'O' No stars. From New Netherlands' 54th Sale, lot 1267, April 1960, where it was catalogued as, "Not in Valentine. Date low, slants up to r.; BADLY RUSTED OBVERSE DIE, MOST OF ITS LOWER HALF INDISTINCT OWING TO THE RUST. Rev. Perfect die of V.1. **This coin shows considerable mint brilliance but owing to weakness of the obverse it is almost impossible to grade. Reverse has practically full original mint sharpness. FINEST OF ONLY FIVE SEEN OF THIS VARIETY, THE OTHERS BEING WELL WORN.** Very much rarer, even as a date, than the 1837, or than the 1838'O' Dime. Finest 1838'O' half dime of any variety which we have handled, one of the three finest of the date seen, and an opportunity not likely to be repeated for decades to come."

We would call the coin Choice About Uncirculated with russet and gold toning, and might point out that it has indeed been "decades" since this highly desirable specimen has been offered at auction. (*SEE COLOR PLATE*)

Lot No. 295

- 295 1838 No drapery. **Choice Brilliant Uncirculated**, gold and lilac with deep peripheral toning. Full head, all stars sharp to centers, satin surfaces. Die break through last star, and another through F on reverse.

Lot No. 296

- 297 1839'O' No drapery. Small 'O'. About Uncirculated, green gold and deep gray toning, date first punched in too low, then repunched higher. Shattered reverse die.
- 298 1840 No drapery. **Choice About Uncirculated**, full head and stars sharp, russet toning. A die break bisecting the obverse vertically from above the head, down through the date.

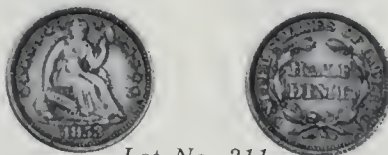

Lot No. 299

- 299 1840 With drapery. **Brilliant Uncirculated**, pale lavender and gold toning. A well struck specimen of this first use of Robert Ball Hughes' redesign of the Gobrecht obverse. Very close to choice, especially for this scarce issue which was struck only in November and December of the year.
- 300 1842 **Choice About Uncirculated**, russet toning, just a hint of rubbing on leg.
- 301 1843 **Brilliant Uncirculated**, light pastel iridescent toning, the obverse field proof-like; shattered reverse die.
- 302 1844 About Uncirculated, 8 in date repunched, deep blue-gray obverse flecked with tan, the reverse lighter.
- 303 1845 **Choice About Uncirculated**, handsome rose gold and pale blue toning. A lustrous specimen.

Comparative Grading Language

Brilliant Uncirculated is at least MS-60

It should be understood by all that grading is a subjective art. See our Terms of Sale for a full explanation.

U. S. SILVER DOLLARS

EXCEPTIONAL 1794 SILVER DOLLAR

Lot No. 741

- 741 1794 Bolender 1. Very Fine, dusky golden toning, a few small carbon spots; exceptionally sharply struck, **all stars at left clear and the date strong**. All letters on reverse complete, though the tops of ATES are weaker than the rest. In this regard, sharper than the Robison specimen, the Carter specimen, the Lord St. Oswald-Jimmy Hayes coin. Obviously struck at the beginning of the strike run when the dies had barely begun to skew; indeed, this may have been the first silver specimen produced, right after the striking of the copper pattern. A very well balanced and pleasing coin. (SEE COLOR PLATE)

VERY RARE 1836 ORIGINAL GOBRECHT DOLLAR

Lot No. 761

- 761 1836 Gobrecht. Name on base, coin axis, eagle flying upward. One of the original 1,000 pieces struck in December, 1836, on the weight and fineness standards of 1792, 416 grains of .8924 Fine silver. Struck as a Proof, as were all of the pieces made in 1836 and 1837, and released to circulation with the majority of the issue. **Choice About Uncirculated**, soft strike on eagle's breast and upper left wing, and matching areas of shield and thighs; quite a bit of proof surface remaining under light toning. A very nice specimen of this rare and popular type coin.

RARE 1836 GOBRECHT DOLLAR

Lot No. 762

- 762 1836 Gobrecht. Name on base, coin axis, eagle flying level. A restrike made at the Mint from original dies, struck in 1858-1859. **Brilliant Proof**, deeply reflective fields, light scuffs on reverse; frosty eagle, lightly toned. The restrikes are much more often available in high grade than the originals, and are popular as type pieces due to the combination of quality and original dies. (SEE COLOR PLATE)

ANOTHER RARE 1836 GOBRECHT DOLLAR

Lot No. 763

- 763 1836 Gobrecht. Another example. Name on base, coin axis, eagle flying level. A restrike, as the last, struck at the Mint in 1858-1859 from original dies. **Brilliant Proof**. A thin scratch at upper right obverse and faint reverse spots, but the fields well mirrored under golden toning.

RARE 1839 GOBRECHT DOLLAR

(SEE COLOR PLATE)

ANOTHER RARE 1839 GOBRECHT DOLLAR

Lot No. 765

- 765 1839 Gobrecht. Another. Eagle in plain field, reeded edge, medal axis, eagle flying level. A restrike made at the Mint in 1858-1859 from original dies. **Extremely Fine**, somewhat soft strike on eagle's breast and upper left wing; mottled smoky tan toning.

Note: We are of the opinion that most of the circulated restrikes were placed into circulation during the Civil War years after the "restrike scandal" of 1859-1860 had made it impossible for the Mint officials to sell them. Inflation had driven the purchasing power of a silver dollar so high that they could be spent at a profit. Most seem to have been recovered from circulation within a couple of years, while still in EF-AU condition.

- 824 **1896 "Bryan Comparative Dollar,"** Zerbe 6. Comparison of silver content of a Morgan Dollar with the actual amount of silver necessary to equal a gold dollar at bullion prices of the day; blank reverse. Issued by Gorham Manufacturing Company. About Uncirculated, mottled toning.

U. S. PATTERN COINS

- 825 **1837 Pattern Cent** in Feuchtwanger's Composition. **Low 120.3E** (R 3-4). Very Fine, nice sharp strike, light golden toning.
- 826 **1853 Pattern Cent** in German Silver. **J.140** (R-6). Reeded edge. Regular Quarter Eagle obverse, the reverse having ONE CENT in a wreath. Brilliant Proof, lightly double struck on obverse.
- 827 **1855 Pattern Cent** in Copper-nickel. **J.170** (R-6). Plain edge. Large flying eagle obverse, ONE CENT in wreath on reverse. Brilliant Proof, golden obverse, deeper reverse; struck from clashed dies. An unusually sharp strike.
- 828 **1855 Pattern Cent** in Copper-nickel. **J.171** (R-7). Plain edge. Same dies as last, but the alloy is 40% nickel and the color is thus more like steel. Brilliant Proof, light gold and iridescent toning, "VI" in obverse field—one of the pieces from an original set of 8 different. Weak strike, typical of this alloy, but nice surfaces.
- 829 **1858 Pattern Cent** in Copper-nickel. **J.191** (High R-5). Plain edge. Large Flying Eagle obverse, ONE CENT in laurel wreath on reverse. Brilliant Proof, golden obverse, the reverse spotty.
- 830 **1859 Pattern Cent** in Copper-nickel. **J.228** (R-1). Plain edge. Regular obverse, reverse adopted in 1860. Brilliant Uncirculated, the reverse prooflike. A handsome example of this "transitional" issue.
- 831 **1865 Pattern Cent** in Nickel. **J.406** (R-7?). Plain edge. Regular dies of the year. Brilliant Proof, light toning, minor freckles; nice sharp strike. Our records of auction appearances indicate a rating of R-6 today.
- 832 **1881 Pattern Cent** in Nickel. **J.1665** (R-6). Plain edge. The Barber design, head and denomination in wreath similar to those adopted for the 5c in 1883. Brilliant Proof, light russet toning. Only 16mm in diameter, this piece is popular as our smallest Cent design.
- 833 **1837 Pattern Three Cents** in Feuchtwanger's Composition. **Low 117** (R-3). Justice and Liberty flanking shield on obverse, denomination, stars and rosettes in wreath on reverse. Extremely Fine, slightly soft strike and the surfaces a bit granular but far better than normally seen. Overall about as sharp and attractive as these ever come.
- 834 **1849 Pattern Trime** in Silver. **J.112** (R-6?). Reeded edge. Regular Half Dime obverse die, "III" on plain reverse. Brilliant Proof, high wire rim, light violet toning; a restrike of the 1858-9 period, 1 and 9 in date repunched. From the record of auction appearances, this issue seems to be R-7 rather than R-6.
- 835 **1850 Pattern Trime** in Silver. **J.125** (R-4). Plain edge. Designs "borrowed" from the 1836 Pattern Gold Dollar. **J.67**. Brilliant Proof, highly reflective fields, pleasing pastel toning. This, and the J.67 series pieces, are both derived from Gobrecht's 1836 "First Steam Coinage" medal, and represent the only use on U.S. coin design of the Liberty Cap in Rays, a design which came into use in Mexico in the 1820's. Presumably Gobrecht saw some of the Mexican coins and adapted the design for use in America.

Lot No. 836

- 836 **1863 Pattern Three Cents** in Copper. **J.319** (R-5?). Plain edge. Obverse modeled after the Large Cents; reverse has 3 CENTS in a laurel wreath. Brilliant Proof, light mint red obverse with deeper red reverse, a spot on lower reverse. A very popular issue, the largest 3¢ we ever made; apparently R-6 rather than R-5, and very seldom available.
- 837 **1865 Pattern Three Cents** in Copper. **J.413** (R-7). Plain edge. Regular dies of the year. Brilliant Proof, deep red with iridescent overtones, a couple of small spots.
- 838 **1869 Pattern Three Cents** in Nickel. **J.676** (R-4). Plain edge. Designs as on the regular issue, but 19mm, and the numerals on reverse smooth. Brilliant Proof, nearly choice, a lovely specimen.
- 839 **1866 Pattern Five Cents** in Nickel. **J.461** (R-6). Plain edge. George Washington on obverse, the reverse with small 5 CENTS in wreath. Brilliant Proof, some small carbon spots on the reverse. Always a popular issue, the first attempt since 1792 to place Washington's portrait on the coinage.

Lot No. 840

- 840 **1866 Pattern Five Cents** in Nickel. **J.467** (R-7?). Plain edge. George Washington obverse, tall 5 in wreath on reverse. Brilliant Proof, light golden toning, some freckles on reverse but a nice overall appearance. Definitely rarer than R-7; it has apparently been offered at auction only twice in 15 years.
- 841 **1866 Pattern Five Cents** in Nickel. **J.470** (R-6). Plain edge. George Washington obverse, reverse with short 5 in wreath. Brilliant Proof, light toning, nice surfaces.
- 842 **1866 Pattern Five Cents** in Nickel. **J.473** (R-6). Plain edge. George Washington obverse, the regular "with rays" reverse of the year. Brilliant Proof, a small spot above head, surfaces well mirrored.
- 843 **1866 Pattern Five Cents** in Copper. **J.498** (R-8?). Plain edge. Shield obverse with ball dividing date and motto in tiny letters; regular reverse of the year. Brilliant Proof, light scuffing on reverse; pale brown and mint red under iridescent overtoning. From the number of auction appearances in the past 15 years, this issue seem to be R-7.
- 844 **1866 Pattern Five Cents** in Nickel. **J.501** (R-7?). Plain edge. Regular obverse of the year; the reverse with tall 5 in wreath. Brilliant Proof, excellent strike, a very attractive example. To the best of our knowledge, this issue has been offered at auction only twice in the last 15 years, and should probably be listed as an R-8.

U. S. PATTERN COINS

- 845 **1866 Pattern Five Cents** in Copper. **J.508** (R-6). Plain edge. Regular obverse of the year; reverse without rays. Brilliant Proof, light olive brown with traces of red, pale iridescent toning.
- 846 **1867 Pattern Five Cents** in Aluminum. **J.561** (R-6). Plain edge. The Longacre design: Liberty wearing headdress of four feathers, with stars and a ribbon reading "Liberty and Union"; reverse with large "V" on ornamental shield. Brilliant Proof, three or four small dents and an oxidized area behind head. The main design elements on both sides are sharp.
- 847 **1868 Pattern Five Cents** in Nickel. **J.624** (R-7?). Plain edge. Obverse as on the 3¢ Nickel; reverse with large 5 CENTS in wreath. Brilliant Proof, struck on a broad, 24mm planchet, with resulting broad border like a frame around the central devices. This issue seems to be in the upper R-6 range rather than a full R-7.
- 848 **1868 Pattern Five Cents** in Copper. **J.626** (R-7). Plain edge. Same dies as last, struck on a normal diameter copper planchet. Brilliant Proof, light freckling; rich red-gold obverse faded from full mint color, the reverse olive with blue overtones.
- 849 **1868 Pattern Five Cents** in Copper. **J.632** (R-8). Plain edge. Same obverse as last; reverse with "V" in fancy wreath, star above. Brilliant Proof, multi-colored iridescent toning. A major rarity, only appearing at auction about once every five years; this elaborate reverse die was used only on J.632, the possibly unique J.632a, and the R-8 J.565. An important opportunity for the Nickel specialist.
- 850 **1868 Pattern Five Cents** in Nickel. **J.633** (R-4). Plain edge. Obverse as last but with a star on coronet; reverse with "V" in wreath, motto ribbon and Maltese cross at top. Brilliant Proof, frosty devices, a slight edge nick at right obverse.
- 851 **1863 Pattern Dime** in Aluminum. **J.327** (R-6?). Plain edge. "Exchanged for U.S. Notes"/"Postage Currency" dies. Brilliant Proof, minor freckles; major die breaks on obverse, one of them bisecting the die. Apparently this issue is an upper end R-7, with only four appearances at auction in a decade and a half.

Lot No. 852

- 852 **1868 Pattern Dime** in Copper. **J.648** (R-5?). Plain edge. Head of Liberty as on late Large Cents; the reverse has TEN CENTS in a wreath. Brilliant Uncirculated with some prooflike areas; mostly mint red, toning toward brown on some parts. As with the 1853 copper 3¢ of the same size, this is a popular issue with Large Cent collectors as well as pattern specialists. In number of auction appearances it seem to be an R-6.
- 853 **1869 Pattern Dime** in Silver. **J.702** (R-5). Reeded edge. Standard Silver design with Liberty wearing a diadem. Brilliant Proof, deep violet obverse, rainbow iridescent reverse.
- 854 **1870 Pattern Dime** in Copper. **J.833** (High R-6). Reeded edge. The Barber seated Liberty design, with the regular reverse die. Brilliant Proof, the obverse fading mint red, the reverse partly red with bluish overtones; a mild discoloration drapery at lower right.

- 855 **1870 Pattern Dime** in Silver. **J.837** (R-5). Reeded edge. The Standard design, Liberty wearing a cap with three stars. Brilliant Proof, pale blue obverse and pastel reverse. A glittering little jewel.
- 856 **1870 Pattern Dime** in Silver. **J.843** (R-5). Reeded edge. Standard design with Liberty wearing a diadem. Brilliant Proof, pink and gold fields with rich blue borders. A lovely specimen.
- 857 **1865 Pattern Quarter** in Copper. **J.426** (R-6). Reeded edge. Regular obverse die, the reverse from the regular die adopted in 1866 with motto on ribbon above the eagle. Brilliant Proof, light golden tan with nicely reflective fields.
- 858 **1869 Pattern Quarter** in Silver. **J.721** (R-5). Reeded edge. The Standard Silver design, Liberty wearing a cap with three stars. Brilliant Proof, rose, sea-green and pale blue toning.
- 859 **1869 Pattern Quarter** in Silver. **J.727** (R-5). Reeded edge. The Standard Silver design, Liberty wearing a diadem. Brilliant Proof, pleasing light blue obverse and rosy reverse, very nice surfaces.
- 860 **1870 Pattern Quarter** in Silver. **J.900** (R-6). Reeded edge. The Standard Silver design, Liberty wearing a coronet with one star. Brilliant Proof with glittering surfaces under handsome rainbow pastel toning.
- 861 **1870 Pattern Quarter** in Copper. **J.884** (R-6?). Reeded edge. The Barber seated Liberty design with the regular reverse die of the year. Brilliant Proof, mint red with vibrant violet iridescence, pleasing to the eye. Probably an R-7 issue, only offered at auction about once every three years.
- 862 **1870 Pattern Quarter** in Aluminum. **J.899** (R-6?). Plain edge. The Standard design, Liberty wearing a coronet with one star. Brilliant Proof, frosty devices, well mirrored fields; free of the oxidation that plagues aluminum issues, and very attractive. Five recorded auction appearances in 15 years, characteristic of an R-7 rather than an R-6.
- 863 **1850 Pattern Half Dollar** in Silver. **J.235** (R-4). Reeded edge. The Paquet design, Liberty seated with fasces and shield, eagle with motto ribbon and thin arrows on reverse. Brilliant Proof, diagonal planchet roller striations as made; minor hairlines, pale rainbow toning.
- 864 **1859 Pattern Half Dollar** in Silver. **J.237** (R-4). Reeded edge. The Longacre design, head of Liberty wearing oak and vine leaf wreath, the reverse with HALF DOLLAR in a "cereal" wreath. Proof, slightly mishandled with some reeding marks on the head; blue-gray obverse, lighter iridescent reverse.
- 865 **1862 Pattern Half Dollar** in Copper. **J.296** (R-4?). Reeded edge. Regular obverse of the year, the reverse of the regular type but with motto above eagle on plain field. Brilliant Proof, pale olive and fading mint red with iridescent overtones. In our experience this issue is a good bit rarer than listed, probably a full R-6.
- 866 **1863 Pattern Half Dollar** in Silver. **J.338** (R-6). Reeded edge. Regular obverse, reverse with "God Our Trust" on scroll above the eagle. Brilliant Proof, deep blue-gray obverse with russet highlights, the reverse brightly iridescent.
- 867 **1863 Pattern Half Dollar** in Bronzed Copper. **J.339** (R-5?). Reeded edge. Designs as last. Choice Proof, bronzed at the Mint; deep red-mahogany toning, superb even surfaces reminiscent of the "Satiny Finish" used on some of the Saint Gaudens double eagles. A beautiful specimen of this issue, which we feel is in the R-6 range.
- 868 **1863 Pattern Half Dollar** in Silver. **J.340** (R-6). Reeded edge. Regular obverse, reverse similar to last but with "God Our Trust" on plain field. Brilliant Proof, lovely rainbow iridescent toning.

U. S. PATTERN COINS

- 869 **1869 Pattern Half Dollar** in Silver. **J.742** (R-5). Reeded edge. The Standard Silver design, with Liberty wearing a cap with two stars. Brilliant Proof, deep blue and red obverse, iridescent rainbow reverse. "GOD W" on motto label first punched much too far right, then repunched correctly.
- 870 **1869 Pattern Half Dollar** in Silver. **J.748** (R-5). Reeded edge. The Standard Silver design, with Liberty wearing a diadem. Brilliant Proof, a symphony of pastel tones, and fully reflective.
- 871 **1869 Pattern Half Dollar** in Silver. **J.754** (R-5). Reeded edge. The Standard Silver design, with Liberty wearing a coronet with one star. Brilliant Proof, glittering blue and rose toning. With the last two lots, this constitutes the entire series of Standard Silver Half Dollar obverse designs.
- 872 **1870 Pattern Half Dollar** in Copper. **J.925** (R-6). Reeded edge. The Barber design: Liberty seated with cap on pole; the Standard reverse, 50 CENTS in wreath. Brilliant Proof, the obverse a handsome red-gold, the reverse deeper red-violet. Nicely reflective fields, some minor spotting which do not detract much from the overall appearance.

Lot No. 873

- 873 **1870 Pattern Dollar** in Copper. **J.1011** (R-7). Plain edge. The Longacre design. Liberty, wearing Indian headdress, seated on globe and holding pole with cap, 22 stars on flag behind her; reverse "1 DOLLAR" in wreath. Brilliant Proof, mint red obverse with a few freckles and light violet overtones, deeper red reverse. To the best of our knowledge, no specimen has been sold at auction since our March 1976 Garrett Sale.

VERY RARE ORIGINAL METRIC DOLLAR

Lot No. 874

- 874 **1879 Pattern Metric Dollar** in Metric Alloy. **J.1617** (R-6). Reeded edge. Barber's large head of Liberty wearing a coronet, a reduction of his design for the 1877 J.1546 "Half Union"; the reverse lists the composition in silver, gold, and copper of the experimental "metric alloy." Brilliant Proof, golden toning, an original weighing 25 grams. The vast majority of pieces offered as "J.1617" seem to be the lighter weight restrikes, J.1618, struck in standard silver.

Lot No. 875

- 875 **1868 Pattern Half Eagle** in Copper. **J.656** (R-6?). Reeded edge. Paquet's design for an international half eagle, head of Liberty with hair bound by a ribbon bearing a star; the reverse lists the denomination in both Dollars and Francs. Brilliant Proof, deep red faded from mint color, blue overtones; broad rim, pleasing appearance. We have no record of a specimen appearing at auction since our 1976 A.N.A. Convention Sale, and suspect the issue is actually R-7.

U. S. PROOF AND MINT SETS

- 876 **1880 Minor Proof Set** of 3 Pieces: 1¢, 3¢ Nickel, 5¢ Nickel. Choice Brilliant Proofs, the 1¢ a pleasing red-gold, the others bright silvery; some iridescence on the 5¢. No spots, no freckles.

RARE GRANT INDIAN PEACE MEDAL

Lot No. 883

- 883 **1871 Ulysses S. Grant. Julian IP-42.** Silver, 62mm, by A.C. Paquet. About Uncirculated, pale lilac toning, holed at top and ring attached, as issued. Much nicer condition than usually seen for awarded specimens. A rare and popular piece.
- 884 **IRELAND. Charles I, 1625-1649. "Ormonde" Crown, n.d. (1643-44).** Obv. Crowned CR. Rv. S over V (5 Shillings) within double circle. S.6544. Attractive medium gray toning. Nearly Very Fine. (Est. \$300-400)

This coinage is named for Lord Ormonde, who was appointed Lieutenant of Ireland in 1643. The Ormonde money was an emergency issue of the Protestant establishment in Dublin during the Catholic insurrection known as the Great Rebellion. The Catholics proclaimed loyalty to Charles I, but Ormonde eventually chose to surrender to Cromwellian forces after the King's defeat at Naseby.

- 991 "1853" to "1886" Group of "California Gold charms," gilt copper, in imitation of the "fractional gold" coins but without any denomination in Dollars or Cents. Includes, Liberty Head, Indian Head, "Eureka", Miners, and a Washington piece. 25 pieces, mixed "quarter" and "half dollar" size; also, a copy of the "octagonal \$50" in gilt copper, circa 1909. **26 pieces.**

RARE FRACTIONAL CURRENCY SHIELD

- 1078 **Original Fractional Currency Shield**, as sold to the public by the Treasury Department in the late 1860's. A gray background shield (the most common of the three varieties), in an original contemporary frame with the gilt inner border. Not as bright as some, but the bottom is better than average, with little of the usual waterstaining (from flooding in a Treasury warehouse), and no damage. The 39 Fractional specimens are the normal varieties and arrangement for a gray shield. Overall an attractive and above average example, worthy of serious consideration.

CONFEDERATE CURRENCY

- 1079 A lovely type collection of Confederate States of America currency, including Criswell Types 8, 9, 13, 14, 18, 20, 21, 25, 26 (2), 28, 29, 30, 31, 33, 34, 36, 37, 39, 41, 42, 44, 45, 46, 49, 51, 52, 54, 58, 59, 62 and 64 through 72, plus a counterfeit of Type 19. - 1083 1¢. EP-4a. Ayer's Sarsaparilla (Medium Ayer's). Very Fine, traces of reverse silvering. Average mica crazing.

Lot No. 1084

- 1084 1¢. EP-5. Bailey & Co. Very Fine, with traces of mint red about the devices. Excellent mica, with a bright stamp. While Bailey & Co. is very scarce in general, the 1¢ denomination is **very rare**, with only about a half dozen known. Missing from most great collections, including our December 1969 sale of the Perl collection, and slightly superior to the Lilly specimen sold in 1967.

Lot No. 1085

- 1085 1¢. EP-6a. Joseph L. Bates "FANCYGOODS." About Uncirculated. **Almost full silver** on the back, traces of silver on the front. The stamp is fully bright, and the mica is extraordinarily clear, with no more than a few pinpoint areas of crazing. Far superior to both the Lilly and Perl examples. Rarely is any issuer or denomination found this nice.

EXTRAORDINARY 1¢ BURNETT'S COCOAINE KALLISTON

Lot No. 1086

- 1086 1¢. EP-9. Burnett's Cocaine Kalliston. About Uncirculated, with better than 95% full silver on the back, and about 60% on the face. **Never have we seen any piece of encased with better silvering.** The stamp is bright and the mica is well above average, with light crazing near the edge from six o'clock to nine o'clock. Difficult to find in nice condition - Perl's was polished, and Lilly's had a stained stamp. Overall a superb example that will no doubt set a record for the variety.

ENCASED POSTAGE

- 1087 **1¢. EP-10.** Burnett's Cooking Extracts. Very Fine to Extremely Fine, with about 40% reverse silver remaining. The stamp is bright, and the mica has minimal crazing and one very short crack.
- 1088 **1¢. EP-12. Dougan, N.Y.** The case is about Very Fine and undamaged, but the mica is crazed and cracked through in spots, resulting in staining of the stamp. **A rare issuer**, seldom seen in better condition.
- 1089 **1¢. EP-13.** Drake's Plantation Bitters. Very Fine to Extremely Fine, about 20% reverse silver remaining, and a few tiny corrosion spots on the face. The mica is well above average, with minimal crazing.
- 1090 **1¢. EP-21.** Mendum's Family Wine Emporium. Very Fine. The stamp is faded, and the mica is average at best.

- 1092 **3¢. EP-33.** Take Ayer's Pills. Very Fine, traces of lustre about the lettering. Slight crazing, with a couple of tiny cracks at the bottom.
- 1093 **3¢. EP-34.** Ayer's Sarsaparilla (small Ayer's). Very Fine, traces of lustre about the lettering. Bright stamp, with minimal crazing to the mica. Well above average. By far the rarest of the three Ayer's varieties.
- 1094 **3¢. EP-34a.** Ayer's Sarsaparilla (medium Ayer's). Very Fine. Average case; stamp and mica above average.
- 1095 **3¢. EP-34b.** Ayer's Sarsaparilla (large Ayer's). Very Fine. The stamp is a bit faded, but the mica is far above average, with the barest minimum of pinpoint crazing. A far scarcer variety than the medium Ayer's, known only on two denominations. Both the Perl and Lilly specimens had cracked mica.
- 1096 **3¢. EP-36. Bailey & Co.** Very Fine to Extremely Fine, traces of lustre about the lettering. The stamp is average, and the mica has light crazing and one pinpoint dent. A scarce issuer, seldom found in decent condition.
- 1097 **3¢. EP-38.** Brown's Bronchial Troches. Very Fine for the case, but the stamp is dull and the mica is crazed and slightly cracked.
- 1098 **3¢. EP-39.** Burnett's Cocoaine Kalliston. Very Fine, traces of silver in the lettering. Bright stamp, very little mica crazing. Superior to both Perl and Lilly.
- 1099 **3¢. EP-40.** Burnett's Cooking Extracts. The case is Very Fine and slightly bent. The stamp is dirty, hardly surprising since there is no mica left.
- 1100 **3¢. EP-42.** Drake's Plantation Bitters. About Very Fine. The mica is above average, but the stamp is a bit dull.
- 1101 **5¢. EP-69.** Burnett's Cocoaine Kalliston. Very Fine, polished. The stamp is bright, and the mica is clear but has moderate crazing.
- 1102 **5¢. EP-70.** Burnett's Cooking Extracts. Very Fine to Extremely Fine, with **virtually full silver** on the back. The stamp is average, and has a horizontal fold, the mica is nice, with minimal crazing.
- 1103 **5¢. EP-78.** J. Gault. Very Fine. Bright stamp, the mica clear, with light crazing.
- 1104 **5¢. EP-83. Kirkpatrick & Gault.** **Extremely Fine**, with better than 75% reverse silver remaining. The stamp is bright, and the mica is clear, with very little crazing. A premium example.

RARE 5¢ WHITE THE HATTER

Lot No. 1105

- 1105 **5¢. EP-95. White the Hatter. Very Fine**, and quite attractive. The stamp is bright, and the mica is clear, with little crazing. There is a short mica crack above the right tab, but no mica is missing, and the stamp is not exposed. A rare merchant, seldom found in decent condition. Krause-Lemke rates it as the 5th rarest of the 34 merchants, and it is believed that less than a half dozen exist of this denomination.

- 1106 **10¢. EP-103. Brown's Bronchial Troches. Very Fine**, with small green corrosion spots. The stamp is very bright, and the mica is clear and far above average, with virtually no crazing.
- 1107 **10¢. EP-105. Burnett's Cocoaine Kalliston. Very Fine to Extremely Fine**, with faint traces of silver in the lettering. A bright stamp, with clear mica, certainly well above average.
- 1108 **10¢. EP-106. Burnett's Cooking Extracts. Very Fine**. The stamp is bright, but the mica has average crazing, and a long horizontal crack through the head, though the stamp is not exposed.
- 1109 **10¢. EP-116. J. Gault. Fine**, polished, with a few minor dents. Bright stamp, mica average, with a short, fine crack that does not expose the stamp.
- 1110 **10¢. EP-120. Kirkpatrick & Gault. Fine**, dark patina on the case. Heavy crazing on the mica.

SCARCE 12¢ DENOMINATION

- 1111 **12¢. EP-148. J. Gault. Fine**, polished long ago. Bright stamp, the mica with some crazing and a few small fingernail-like indentations, but solid. A scarce and desirable denomination.

Lot No. 1116

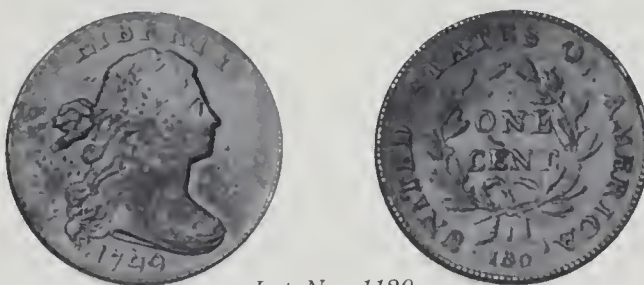

- 1116 1794 Sheldon 18b (Low R-4). **Head of 1793**, edge of 1794, double chin. Sharpness of Fine-12, but numerous small pits around the head and across the reverse. This piece is the **Hays plate coin** for the reverse of Hays 3; it has Hays' white ink "H.52" on the edge. Presumably he could find no more photogenic specimen. The surface pitting lowers the effective grade to Very Good-10, but the coin is desirable because of its past ownership.
Ex Philip Van Cleave Sale (Kagin's), lot 5021, January 1986.
- 1117 1795 S.74 (R-4). Lettered edge, single leaves. Very Good-8 in terms of wear, but the overall grade lowered to G-6 because of edge bruises and some old scratches; deep brown and black toning, main details clear.
- 1118 1796 S.104. LIBERTY; triple leaf under O. Very Fine-20, slightly porous; deep slate gray toning, quite even.

Lot No. 1119

- 1125 1803 S.249 (R-4). Mumps obverse, corrected fraction. Extremely Fine-40, medium brown and golden with lustre evident in several areas. A few nicks, but the traces of mint red outlining the devices more than offsets them.

U. S. EAGLES (\$10.00 GOLD)

RARE 1800 EAGLE

Lot No. 1522

- 1522 1800 Breen 1-A. Only dies of the year; High R-4 as a date. Choice Extremely Fine, medium yellow gold toning, light chafing in open fields, prooflike surface around obverse legend, date and stars. The entire motto on reverse is readable, though EP is somewhat weak. An unusually nice specimen of this underrated date, and from the earliest die state with the break through tops of LIBERTY hair-thin and **no breaks on the reverse**.

This same reverse die had previously been used as Breen's reverse G of 1799 (w/large stars obverse); pieces of that 1799 issue are known both without reverse die breaks, and with them; the final use of the reverse die, as reverse A of 1801, appears only with die breaks in an advanced state.

*The only possible conclusion regarding strike sequence is that the first issue of 1799 Br.5-G took place before the reverse die cracked; then the 1800 Br.1-A pieces were struck, the reverse initially unbroken, with both dies developing cracks progressively; after the 1800 obverse die failed completely, the old 1799 Br.5 obverse die was pressed back into service to allow the Mint to fill an order for Eagles late in the year. Finally, the reverse was again used for the first issue of 1801 Br.1-A, an R-7 issue as **both** dies failed quickly.*

The most probable period for production of the 1800-dated Eagles involved the mint deliveries of July 15 and 26, and perhaps part of the delivery of September 4; the 5,999 pieces delivered in November would certainly have been dated 1799, and we suspect that at least a part of the September delivery was also made with the 1799 obverse. This distribution would leave the mintage of 1800-dated pieces at about 6,000, and the total of 1799-dated pieces around 37,500.

The present coin is the only specimen we have ever heard of with a completely unbroken reverse!

- 1523 1847'O' Very Fine, small reverse edge nick.
1524 1849 Very Fine and lustrous.
1525 1849 Another. Very Fine.
1526 1851 Very Fine, some obverse bagmarks.
1527 1852, 1902'S' Very Fine, both were formerly mounted. 2 pieces.
1528 1853 Extremely Fine, nearly a grade better. An attractive example of a No Motto eagle.

- 1624 **\$10.00 1849.** Variety with TEN D. Obverse: Liberty head facing left; MOFFAT & CO. on diadem; large date below; thirteen stars around. Reverse: Eagle as on regular United States issue; TEN D. below; S.M.V. (Standard Mint Value) CALIFORNIA GOLD around. Reeded edge. Only Good, perhaps Very Good but numerous scratches and dents as well as die state prevents an exact evaluation of grade. The reverse is by far stronger than the obverse. A rarity even in this condition.
